

Digital as usual! Der Dr. Harnisch-Newsletter

Dr. Harnisch Digital Newsletter für Petfood Hersteller

NEW!

Der neue **Dr. Harnisch Newsletter**, eingeleitet von „The Editor's Focus“, ist ein primäres Kommunikationsmittel für Information und Werbung. Wir berichten über ein weites Spektrum an Themen für die Petfood Hersteller, die aus unserem umfangreichen Netzwerk stammen. Der Petfood Newsletter erscheint zwei Mal monatlich mit Artikeln und gesponserten Nachrichten für z. Zt. 8500 Leser in aller Welt.

Derzeit insgesamt 8500: 4000 Europa (1900 D.A.CH), 2000 Amerika, 2000 Asien, 500 übrige Welt

The newsletter layout includes the Dr. Harnisch logo at the top left, followed by a large orange header section featuring the petfoodpro logo and the title "cama Pet Food". Below this is a "The Editor's Focus" section with a portrait of Ian D. Healey and a text block. The main content area contains several sponsored news items, each with a thumbnail image, a title, and a brief description. At the bottom, there is a note about other themes available on the website.

The Editor's Focus

Dear Readers: We are enjoying this new digital option, the Dr. Harnisch Digital Newsletter brought on as an extra Corona option to help readers keep in touch with some of our ingredients, processing and packaging topics. We enjoy the focus on specific themes – and this time use the opportunity to give an brief insight into our recently launched publication PetFood PRO for manufacturers in the animal nutrition sector. I hope you also enjoy this newsletter and can learn something new and share it with colleagues and friends. „If you like it – subscribe!“ **Sincerely, Ian D. Healey**

Natural Oils and Fats in Pet Care Products: Good for Pets, Good for the Planet

The trend towards natural cosmetics for humans is increasingly being transferred to animal care. Pet parents wish for care products which fit the individual needs of their domestic animal exactly - for instance its type of fur - and which are beyond that free from petroleum-based components. Brewers' Yeast Cell Walls – for Intestinal Health and Protection!

This fermentable, prebiotic substrate, is able to bind E.coli and salmonella within the intestine and has a positive influence on the gut microflora and immune system. *Saccharomyces cerevisiae* is an eukaryotic, single-celled microorganisms which converts carbohydrates to carbon dioxide and alcohols by fermentation.
